Mechanical-turned-software engineer skilled in JS, TS, HTML, SCSS, React, React-Native, Redux, Apollo, Tailwind, Node.js, Express, Python, Django, MongoDB, Postgres, SQL, GraphQL, Redis, Celery, Mocha, Jest

Experience

Darwin Homes | *Fullstack Software Engineer*

Apr 2021 – Jun 2022

- Automated various processes for our home renovation workflows and simplified field tasks for operators by revamping Darwin Homes' mobile app using React Native.
- Gathered requirements to build complex application features and API routes using GraphQL/Apollo and implemented full lifecycle integration tests while resolving user bugs and issues in a timely manner
- Developed reusable front-end components for our in-house library using TypeScript and React while testing for expected functionality using Jest.
- Refactored legacy code to include best practices and improve application performance.

Sevan Multi-Site Solutions | *Assistant Project Manager*

Aug 2018 – Dec 2019

- Drove job completion with project managers, handled project closeouts for multi-site clients while overseeing punchlist completion and general contractors.
- Coordinated with clients for scheduling, pre-construction services, and construction oversight.

Durr Mechanical Construction | *Project Engineer*

Jan 2017 – Apr 2018

- Improved field work output by provisioning upcoming plans while managing pipe installations. Prepared tracking sheets while documenting daily progress to meet scheduling requirements.

Projects

Phantom: Financial Management App | <https://phantombudget.herokuapp.com>

Feb 2021

- Designed a financial management app. Managed user data using MongoDB while leveraging Semantic UI, Plaid API for automatic bank transaction imports, and Chart.js for interactive data visualization

Techflip-Flip: Mobile Game

Jan 2021

- Created a memory card React-Native game, with multiple levels and a responsive UI.

Bookshopper: E-Commerce Site

Dec 2020

- Built an e-commerce app with user authentication and persistent checkout features using local storage.

Education

Fullstack Academy | Software Engineering | NYC TTP

Feb 2021

StonyBrook University | *BS Mechanical Engineering*

May 2016
